Dear Sir,

FEEDBACK ON TYRE PROTECTOR

It is a great pleasure to give feedback on the four LDV vehicles that we treated with your tyre sealant at Sigma Collieries eight months ago.

Since the installation of Tyre Protector Tyre Sealant on 10 December 2007, we experienced no flat tyres or punctures on these vehicles.

Our cost on puncture repairs dropped to zero during this time. It seems that the tyre life has also increased as we had not changed any tyres.

We look forward to implement the product on our LHD's and U/g Tractors to reduce cost and downtime as the above proofed that your product is efficient and cost effective.

Yours Faithfully
